

### REMARKS

Applicant's attorney Bentley Olive conducted a Telephone Interview with Examiner Mizrahi on February 15, 2006 regarding the fax submission of Exhibits A and B on December 15, 2005. Applicant's attorneys sincerely appreciate Examiner Mizrahi's time and consideration in participating in the Telephone Interview.

Examiner Mizrahi was unable to read the Exhibits and suggested mailing the Exhibits. Attached are Exhibit A and B. Please note the Exhibits can be pieced together by referring to the attached grids.

By submission of the attached copies of Exhibits A and B, applicant respectfully submits that Amendment B is fully responsive to the Official Action dated March 1, 2005. Further, applicant respectfully requests reconsideration of Amendment B.

### CONCLUSION

In light of the above amendments and remarks, it is respectfully submitted that the present application is now in proper condition for allowance, and such action is earnestly solicited.

If any small matter should remain outstanding after the Patent Examiner has had an opportunity to review the above Remarks, the Patent Examiner is respectfully requested to telephone the undersigned patent attorney in order to resolve these matters and avoid the issuance of another Official Action.

# NADII Data Warehouse

Search by UserSet and Name

Search By UserSet and Keyword

## Search DB by Name and User Set

This form returns a list of sequences in fasta format

1. Please enter list of sequence names

(Example: 'nbxb0001dH12F' or 'nbxb0024aA01r')

☐ I just know the beginning of the name - use "like"  
(Note: it might take some time if you choose this option)

Note: sequence names are case sensitive

2. AND select one or several

(if nothing appears in the list below)

- All
- Boltylis 2000-06-12 assembly
- Boltylis 2000-08-17 assembly
- Boltylis sequences
- Clemson Univ. rice BAC ends
- \*\*\* The June and May Fusarium

San Diego - Microsoft Internet Explorer

# Frequently Asked Questions:

## 1. What is XML?

- The acronym stands for eXtensible Markup Language
- HTML is also XML, and both are derived from SGML (Standard Generalized Markup Language)
- It is a meta-language for representing structured data

## 2. What is the purpose of XML?

- Allows cross-platform formatting and organization of data
- Allows application and platform independent data exchange
- It separates content from its representation
- It facilitates the reuse of information

## 3. Where is XML used?

- E-commerce

A3

- Business-to-business communication
- Exchanging data of any kind without the need of file conversion
- Improved “smart” search engines on the web

#### 4. Is XML a standard?

- Yes, version 1.0 of the XML specification was accepted by the World Wide Web Consortium (W3C) as a recommendation on February 10, 1998.

## 5. What do I need to create/view XML documents?

- XML is just text, so any text editor can be used to view/edit files
- XML documents can be viewed in a tree-like form in the Internet Explorer

## 6. What is XSL?

- The acronym stands for eXtensible Style Language
- Similar to HTML's Cascading Style Sheets (CSS)
- Used to transform XML into HTML to be viewed in a browser
